

BUILDING OUR FUTURE FORWARD

ST. IGNATIUS COLLEGE PREPARATORY NEW LEARNING COMMONS

AMAZING HISTORY. INSPIRATIONAL FUTURE.

SI is a community of lifelong learners that has been educating students in the San Francisco Bay Area since 1855. We seek to send graduates into the world as men and women with and for others, leaders concerned about the society and world in which they live.

To keep this mission relevant, dynamic, and flexible, we need facilities to match the ambitions and talents of our students and faculty. As we look forward, we are determined to ensure the SI community has the necessary spaces and tools to challenge students academically while nurturing them spiritually.

FORWARD THINKING

We are launching the **Building Our Future Forward** campaign for a New Learning Commons on the north side of campus. We have partnered with the acclaimed San Francisco architecture firm, Mark Cavagnero Associates, to design 130,000 square feet of flexible, sustainable space to replace the existing McGucken Hall, Carlin Commons, and Orradre Chapel and Courtyard.

The New Learning Commons will be SI's most ambitious project in our history. Once completed, it will enhance our traditional, immersive, project- and technology-based learning, and will be a legacy for generations of Wildcats to come.

RENDERINGS OF THE NEW LEARNING COMMONS
